Online service to help organisations comply with the CRC Scheme

'Carbon Counter ' is a new online service which will help prepare South West businesses for the CRC Energy Efficiency Scheme (formerly known as the Carbon Reduction Commitment) has been launched by environmental data specialists, Landmark Information Group.

This new service, developed in partnership with Enviros, has been designed specifically to help organisations in the public and private sectors comply with all the requirements of the CRC.

The Carbon Counter is a compliance tool which provides step-by-step guidance through the CRC regulations, helping to ensure that organisations meet their compliance obligations. It also provides a safe data collection and storage solution in preparation for their submission to the Environment Agency.

[Click here](#) to find out more information on the CRC and establish whether you are legally obliged to register for CRC.
